HIKARI

Nutrition for the Brain, Eyes, and Children with Special Needs

Hikari is specially designed nutrition for eye and brain health. Additionally, Hikari can serve as an alternative source of nutrition for children with special needs.

The brain and eyes are the organs we use most frequently in daily life, yet they are often overlooked in terms of their nutritional needs. Hikari is here to help you maintain proper nutrition for your eyes and brain.

Overall Function of HIKARI

Hikari is a nutritional product for the brain and eyes, containing various organic active ingredients such as Marigold Peptide, Spearmint Peptide, and Mango Leaf Peptide. It has positive functions for your body and also works to meet the nutritional needs of the brain and eyes. With a healthy brain and eyes, daily activities will remain normal, and the body will stay healthy.
